

STATE BUDGET UPDATE

**Gary S. Olson, Director
SENATE FISCAL AGENCY**

January 16, 2008

<http://www.senate.michigan.gov/sfa/>

January 2008 Economic Forecast

- After increasing by 2.2% during 2007, the United States economy is expected to grow by 1.8% in 2008 and 2.6% in 2009.
- United States economic growth in 2008 and 2009 will be restrained by weakness in the housing market and higher prices, particularly for energy, food, and commodities.
- There is a 50% risk these factors may pull the national economy into a recession in early 2008.
- Following the 2001 recession, the United States economy did not experience significant employment growth until the summer of 2003. Since this time, United States employment has increased by 8.7 million jobs or 6.4%. United States payroll employment has increased for 52 consecutive months.
- The Michigan economy has shown little improvement since the 2001 recession.
- Since the Michigan employment peak in June 2000, Michigan wage and salary employment has declined by 448,100 jobs or 9.5%.
- During this same time period Michigan has lost 32.8% of its total manufacturing jobs and has lost 46.0% of its vehicle manufacturing jobs.
- Michigan wage and salary employment is expected to continue to decline, by 1.9% during 2008 and by 0.8% during 2009. The estimated decline in employment during 2009 will mark the ninth consecutive year of employment decline in Michigan.

**January 2008
Consensus Revenue
Estimates**

Consensus Revenue Estimates: January 11, 2008 Summary

FY 2006-07 Final Revenue Collections

The actual level of FY 2006-07 General Fund/General Purpose (GF/GP) and School Aid Fund (SAF) revenue collections exceeded the May 2007 consensus revenue estimate.

FY 2006-07 GF/GP revenue collections exceeded the May 2007 consensus revenue estimate by \$133.3 million. The majority of the increased revenue can be attributed to income tax collections and a variety of nontax revenue sources.

FY 2006-07 SAF revenue collections exceeded the May 2007 consensus revenue estimate by \$76.0 million. The majority of the increased revenue can be attributed to income tax collections and net revenue from the State lottery.

FY 2007-08 Revenue Estimates

The January 2008 consensus revenue estimate represents a decline from the May 2007 consensus revenue estimates.

The current FY 2007-08 GF/GP consensus revenue estimate is \$234.1 million below the May 2007 consensus revenue estimate. This revenue decline is from a combination of changes in tax policies, \$114.0 million; and a reduction in forecasted economic growth, \$120.1 million. The tax policy revenue loss represents the revenue loss from shifting from an expansion of the use tax base to a surcharge on the Michigan Business Tax.

The current FY 2007-08 SAF consensus revenue estimate is \$135.8 million below the May 2007 consensus revenue estimate. This revenue decline results from a reduction in forecasted economic growth.

FY 2008-09 Revenue Estimates

The January 2008 consensus revenue estimate is the first estimate of FY 2008-09 GF/GP and SAF revenue. The consensus estimates forecast modest revenue growth as a result of continuing economic problems in the State and the implementation of tax policy changes.

The FY 2008-09 GF/GP revenue estimate is \$52.8 million or 0.6% below the current estimate of FY 2007-08 GF/GP revenue. This initial estimate of FY 2008-09 GF/GP revenue reflects a \$133.6 million revenue loss from the first phase of the implementation of an earned income tax credit under the income tax. Continuing economic problems in the State will lead to growth of less than 1.0% in both sales tax collections and income tax withholding.

The FY 2008-09 SAF revenue estimate is \$517.5 million or 4.6% above the current estimate of FY 2007-08 SAF revenue. This estimate reflects the earmarking of an additional \$341.6 million of Michigan Business Tax revenue to offset local losses of personal property taxes. Adjusting for this earmarking increase results in a 1.6% increase in net SAF revenue.
